PDF Acrobat

Product Description This pack includes a creative and fun, 10-week picture book study based on the wonderfully Australian book 'A Bug Called Doug' written by Chris Collin and Megan Kitchin. Also included a student work booklet. Lesson plans are linked to the Australian, NSW and Victorian curriculum with all outcomes included. It includes a fun and exciting child-centred STEM activity and all blackline masters needed for the lessons.

Each lesson includes alphabetised appendices to use. Print and place in your class program ready to teach and simply sign and date for teacher registration purposes.

What's Included-Fun Tasks and Activities to Print Some lessons require preparation such as printing and laminating. Minimal craft materials are needed. The materials used are materials that can be found in most schools.
